

National Safe Boating Council

1402.17- Instructor Boat Control Instruction for Power Boats

\$170,000

The National Safe Boating Council (NSBC) Instructor Boat Control Instruction for Power Boats will train instructors and they, in turn, will train recreational boaters in the national on-the-water "Boat Control" curriculum for power boats. The instructor training courses will increase the number of certified and trained instructors. It builds the foundation for a force-multiplier effect. These newly certified instructors will then train approximately 1,000 others in the curriculum in the short-term. Increasing the number of trained power boat operators will ultimately reduce boating accidents and fatalities.
